SKILLS

Agile | AWS (S3) | CSS | Git | HTML | Java | JavaScript | Jira | NodeJS
Postgres | Postman | Python | React | RDBS | Ruby | Salesforce | SQL

PROJECTS

Full Stack Browser IDE - GitHub | Website | Demo
An integrated development environment to build, save and load frontend code within the browser
- Designed using React components, hooks and Ruby on Rails to handle data request and API endpoints
- Deployed the project with Heroku and Netlify services providing more accessibility for the project
- Created a custom hook that persisted data and stored it for the user in the application

WORK EXPERIENCE

Ever Ready Group - Purchasing Agent
03/2023 - Current
- Orchestrated the acquisition of high valued goods while maintaining an efficient supply chain ensuring the quality and timely delivery of products to customers
- Conducted cost analysis, price comparisons, and market research to obtain the best possible prices and terms for goods
- Monitored inventory levels, replenished supply and stock in order to maintain optimal levels of while avoiding shortages and overstock
- Negotiate terms and conditions with suppliers to secure favorable agreements that benefit the organization

Dun & Bradstreet - Software Engineer
09/2021 - 08/2022   Short Hills, NJ
- Developed code adhering to best practices in the SDLC focusing on reusable design patterns, code legibility and maximizing security
- Maintained and monitored 5+ client accounts within a SaaS web application serving as Tier 1 or Tier 2 support (Bug triages, peer to peer meetings and adhoc code changes)
- Composed accurate and technically detailed Confluence documents for our clients, developers, sales team and other team members to reference.
- Participated in weekly code reviews, bug bashes, tech debt meetings and other ceremonies to ensure the efficacy of our code base was top notch
- Integrated D&B APIs to create backend services for 10+ user stories allowing clients to get a custom data package

Merck - Structured Data Analyst
03/2019 - 07/2020   Rahway, NJ
- Compiled unstructured data from encrypted sources that would serve as valuable artifacts for Merck's eDiscovery team
- Examined large datasets up to 25k records from web applications, APIs and CRMs to be cleaned, transformed and loaded into data packages
- Partnered with managers to draft 20+ standard operating procedures and mentored newer analyst to adhere to the company's best practices
- Assisted in quality assurance reviews of multiple data packages in order to ensure 100% accuracy and data security before a file transfer
- Worked on a side project with 2 other team members to take apart laptops, decrypt and re-encrypt hard drives that had lots sensitive information

EDUCATION

Flatiron School   New York, NY
Full Stack Web Development   11/2020 - 04/2021

Rutgers University   New Brunswick, NJ
Bachelor of Arts in Information Technology   07/2014 - 05/2019
